

ANNUAL  
REPORT **20  
23**

---

# Lilly Cares<sup>®</sup> **Foundation**

---

Words are not enough to express our thanks. **You are a rare kind of generous.** Thank you so much for the Humulin R U-500. **Kind Deeds Change Lives!**"

## In 2023, the Lilly Cares® Foundation (Lilly Cares) focused on exceptional delivery of our purpose:

**providing medication at no cost to those qualifying patients in the U.S. with significant financial need.** This means not only ensuring patients in our program receive their prescribed Eli Lilly and Company (Lilly) medication on time throughout the length of their enrollment but making every step of their Lilly Cares experience as simple and stress-free as possible.

Among our program improvements was moving from two pharmacies that specialized in dispensing different types of medications to a single pharmacy provider in 2023. This has simplified the patient experience as one pharmacy now manages all prescription processing, medication shipments, and the thousands of interactions we have with patients and providers daily.

We also consolidated our multiple patient assistance program application forms into a single application, using health literacy principles to make the enrollment process as clear and easy as possible for patients. Additionally, callers can now choose to access information on the status of their application through our automated phone line in addition to speaking to a Lilly Cares agent.

We were excited to add the new ulcerative colitis therapy Omvoh™ and leukemia therapy Jaypirca® and make them available at no cost to qualifying patients through Lilly Cares.

In all, 2023 was a strong year as we continued supporting patients in need with \$3.9 billion worth of medication.

Recognizing the ever-evolving technology landscape, our portfolio of Lilly-donated medications, and the needs of those we serve, we are excited to uncover even more improvement opportunities in 2024. We look forward to continuing to effectively serve patients who rely on us for access to life-changing medicine.

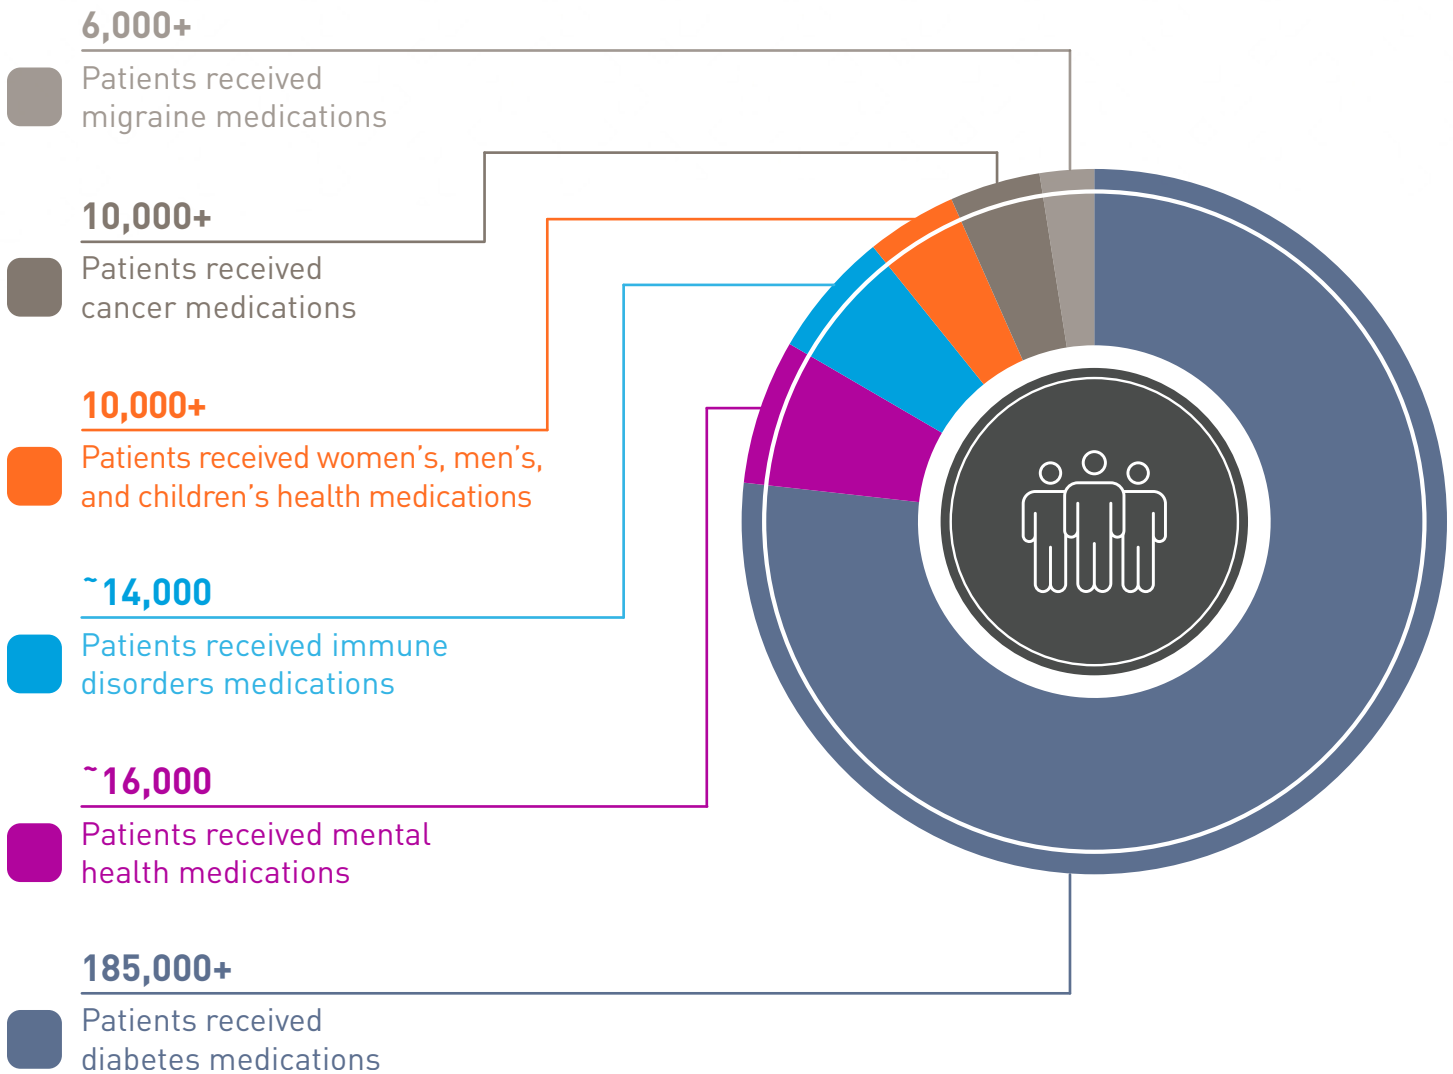

I hope you find this annual report helpful and informative. Please visit [www.lillycares.com](http://www.lillycares.com) for more information about Lilly Cares.
